THE MOBILE TICKETING SYSTEM FOR THE MARITIME TOURIST TRANSPORT

It 's an online BOOKING and TICKETING platform developed by Neido.com Srl, a company in business for over 10 years and founded by a group of professionals with multi-year experience in software development.

- is a procedure designed and realized to be used **by Internet**
- the platform allows the complete management of the **ON-LINE BOOKING** both from the availability and sale point of view
- provides **different access levels** to the functions: ADMINISTRATOR, INTERNAL PERSONNEL, AGENCY AND PRIVATE CUSTOMER
- produces the “**PDF TICKET**” which can be directly transmitted by fax and/or by e-mail

FASTBOOK

NeFeSy Fast Book
Advanced Web Booking Software

PECULIARITIES

- allows full control of Adv
- no plug-ins or module has to be installed locally
- check-in operations can be performed in various way
- Online check-in can be performed using Palmtop connected to the system via Wi-Fi too

- it follows the **Company business policy**
- **garage management space** is very accurate (even with different heights)
- it can be **connected** with the main CRS
(Galileo SIGMA, AMADEUS, SABRE, FORTH, AFerry.To, START. etc...)
